

ACO Surface Water Management

OMV, July 2013

OMV Trakia Highway

Surface Water Management solution for petrol stations

ACO Monoblock - line drainage

ACO is the preferred supplier of surface water management systems for OMV petrol stations. The designers of the project together with the ACO Design team developed a complete drainage and waste water solution with focus on optimal functionality and durability.

The surface water is collected with ACO Monoblock RD and ACO KerbDrain. Beside the line drainage, also ACO Combipoint street gullies are installed. The collected water from the area is treated with two oil separators – ACO Oleoplass and ACO Oleopator.

ACO. The future of drainage.

ACO Monoblock - line drainage

Reference at a glance

Project: OMV
Location: Trakia highway
Client: OMV Bulgaria
Designer: Maya Pranchova
Builder: Ecoton

Year of construction: 2013

ACO Products:
ACO Monoblock RD
ACO KerbDrain
ACO Combipoint
ACO Oleopator
ACO Oleopass
